Utah Navajo Health System, Inc. takes Medicaid, CHIP and PCN.
P.O. Box 130, Montezuma Creek
(435) 651-3291

Did you know:

When there is no fluoride in the water system, most children need fluoride drops or pills when they are very young. Ask your pediatrician or dentist about your child.

If you are pregnant, getting your teeth cleaned at the dental office in the 22nd to 26th week of pregnancy, can help you have a full term pregnancy.

Dental Benefits Summary for CHIP

This benefit is for children who qualify for CHIP A:

You may have the following care at no charge to you and with no co-payment:

- Check-ups with x-rays and a cleaning every six months
- Examination and x-rays for an emergency problem

You may have the following care with a \$3 per procedure co-payment:

- Pulpotomies for infected baby teeth
- Extraction (pulling) of teeth
- Palliative (a single service to solve an urgent problem causing pain) treatment

This benefit is for children who qualify for CHIP B:

You may have the following care at no charge to you and with no co-insurance:

- Check-ups with x-rays and a cleaning every six months
- Examination and x-rays for an emergency problem

You may have the following care with a 20% co-insurance payment per procedure:

- Pulpotomies for infected baby teeth
- Extractions (pulling) of teeth
- Palliative (a single service to solve an urgent problem causing pain) treatment

If you do not have the co-payment, please cancel your appointment the day before. Please help the dentist by not simply failing an appointment because you cannot afford the payment that day.

You must go to a dentist who is enrolled with CHIP. Dentists who take CHIP or Medicaid may not be the same. If you want to take your family to the same dentist, but have different benefits, make sure you ask which benefit programs they take. Please bring your CHIP card to each appointment.
