 - Medication(s) Name: _____ Chart Note Page #: _____
 - Medication(s) Name: _____ Chart Note Page #: _____
- Baseline body weight prior to starting Lybalvi: _____
- Patient is not concurrently using Lybalvi with opioid agonists. Patient must be off short-acting opioid agonists for at least 7 days, and long-acting opioid agonists for 14 days.

Re-authorization Criteria: *(ALL of the following must be met with chart notes submitted for all requests)*

- Updated notes that support the continued clinical benefit of the medication must be submitted.
- The patient's increase in body weight is **NOT** more than 10% baseline body weight prior to start Lybalvi.
 - Updated body weight after starting Lybalvi: _____

Initial Authorization: Up to three (3) months

Re-authorization: Up to one (1) year

b. Board Discussion:

Dr. Weinstein shared her thoughts on opioid use concurrently with Lybalvi on the PA document and asking for others' thoughts on buprenorphine use and making the distinction on the prior authorization form between agonists by adding "opioid agonist".

Further clarification on time frames for patients who were taking short-acting and long-acting opioids, as this is a contraindication. Dr. Weinstein does not feel the time frames are medically necessary on the PA form.

Dr. Siegfried mentioned H.B. 437 which refers to the preferred drug list and if this prior authorization can be enforced.

Bryan Larson clarified further on the H.B. 437 comment and shared that Medicaid Pharmacy does have oversight to create prior authorization for psychotropic medications.

Dr. Weinstein mentioned that we are lacking data on patients who have eating disorders and substance use disorders which are more common in the Medicaid population.

c. Board Action:

Sharon Weinstein, MD moved to approve on amended PA and
