Utah Department of
Health & Human
Services

Attention Utah Medicaid Pharmacy Providers

COVID Vaccine Update

Effective Wednesday, February 14, 2024, the Utah Medicaid pharmacy point of sale programming for COVID vaccines will be updated to no longer require:
- SCC codes for 1st dose and 2nd dose
- Basis of Cost 15 "free product"

The pharmacy is the cost of the vaccine using the lesser of logic and the associated dispensing fee. For the pharmacy to receive the $40 administration fee for a COVID vaccine, they must submit the code "MA" in the professional service code field.

For questions, please contact the Utah Medicaid Pharmacy Team at 801-538-6155 option 3, 3, 2.

**Once the updated programming is deployed, Change Healthcare will perform a batch claim reprocess to ensure all pharmacies who have processed and received a paid claim for a COVID vaccine beginning October 1, 2023, are reimbursed appropriately.
