(a) State funds are used in both assistance and administration.

State funds are used to pay all of the non-Federal share of total expenditures under the plan.

X There is local participation. State funds are used to pay not less than 40 percent of the non-Federal share of the total expenditures under the plan. There is a method of apportioning Federal and State funds among the political subdivisions of the State on an equalization or other basis which assures that lack of adequate funds from local sources will not result in lowering the amount, duration, scope or quality of care and services or level of administration under the plan in any part of the State.

(b) State and Federal funds are apportioned among the political subdivisions of the State on a basis consistent with equitable treatment of individuals in similar circumstances throughout the State.

(c) To assist in the funding of essential medical services, the State Medicaid Program seeks voluntary contributions. Contributed funds will be placed under the administrative control of the State Medicaid Agency. With the exception of funds appropriated by the State of Utah and local governments, payment rates to specific providers will not be based on contributed funds. Providers receiving funds from State appropriations and local governments may contribute or transfer funds up to the amount of the appropriation. Such contributions of transfers of appropriated funds may be used to direct increases to payment rates for specific providers.
